Education

University of Florida Gainesville, FL

Bachelor of Science in Computer Science *Jun. 2022 – Dec. 2026*

- Relevant Coursework: Operating Systems, Data Structures and Algorithms

Experience

Oracle May 2026 – August 2026

Software Engineering Intern *Austin, TX*

- Managed and troubleshot a Podman-based multi-service development environment spanning Linux, Oracle Database, Vault, RabbitMQ, VirtualBox, and interconnected Textura Payment Manager services.
- Developed and debugged full-stack functionality using JavaScript, Python, Oracle JET, Knockout.js, HTML/CSS, and REST-based services across production-facing TPM workflows.
- Diagnosed complex environment and infrastructure failures involving DNS, VPN networking, internal repositories, container dependencies, and service configuration, restoring local development workflows through Linux CLI and container-level debugging.
- Traced frontend defects across shared components, localization logic, application state, and responsive layouts using Chrome DevTools and JavaScript, validating fixes across multiple user and regional configurations.

Oracle May 2025 – August 2025

Software Engineering Intern *Austin, TX*

- Configured and maintained Textura's containerized local development environment using Docker, Ubuntu, Linux, VirtualBox, SSH, VPN networking, and port forwarding to support development across distributed services.
- Developed full-stack functionality using JavaScript, Python, and SQLAlchemy, implementing frontend and backend changes within Oracle Textura Payment Manager.
- Investigated application, API, and database issues using Linux CLI, Docker services, application logs, SQL/database tools, and backend request validation to identify root causes across the TPM stack.
- Contributed within an enterprise Agile workflow using Git, Jira, Confluence, branching, pull requests, code reviews, stand-ups, and bug triage while collaborating with senior engineers.

Projects

Data Quality Analysis Platform | *React, TypeScript, Python, FastAPI, pandas, SQLAlchemy, SQLite* Aug. 2026 – Present

- Developed a full-stack data quality platform integrating a React/TypeScript dashboard with a Python analysis pipeline to identify missing values, duplicate records, and statistical outliers in uploaded datasets.
- Built interactive CSV upload and reporting workflows with configurable parsing options, sortable diagnostic tables, severity indicators, and persistent report history.
- Integrated FastAPI REST endpoints with SQLAlchemy and SQLite to store analysis results and retrieve reports across page refreshes and server restarts without retaining raw dataset rows.
- Hardened CSV processing with file-size limits, delimiter validation, custom missing-value handling, and structured error responses to support reliable ingestion across varied dataset formats.

Extracurricular Involvement

Kappa Alpha Psi Fraternity, Inc. Mar. 2025 – Present

Vice Polemarch *Gainesville, FL*

- Implemented a digital tracking system to monitor attendance and participation for 25+ members, improving efficiency by 50%.
- Streamlined the event approval process with email-based validation, improving reporting accuracy by 40% and ensuring compliance with chapter participation requirements.
- Organized and facilitated 50+ chapter and committee meetings, coordinating agendas, delegating action items, and following up with members to ensure organizational priorities were completed.
- Tracked and documented 100+ chapter events and activities, maintaining records of participation, programming, service, and internal operations to improve chapter organization and accountability.

Technical Skills

Languages: Python, JavaScript, SQL, HTML, CSS
Frameworks/Libraries: React, Node.js, Express.js, Flask, SQLAlchemy, Oracle JET, Knockout.js, Axios
Databases & APIs: Oracle Database, MongoDB, REST APIs, Spotify API, Web Services
DevOps & Infrastructure: Docker, Podman, Linux, Ubuntu, VirtualBox, Vault, RabbitMQ, SSH, VPN Networking
Developer Tools: Git, VS Code, Chrome DevTools, Jira, Confluence, Puppeteer, Linux CLI, Version Control
Technical Concepts: Microservices, Containerization, API Integration, Debugging, Integration Testing, Agile Development, Data Structures & Algorithms
